

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## To the English Reader.

---

**W**henever a new publication is offered to the publick, the author should have it in his power to point out the use and necessity of increasfing, by his performance, that immense literary store, which, however it may forward the professedly learned in their researches, seems

likely enough to puzzle the student, who treads the mazes of science without a clue to conduct him. Indeed, since the revival of letters in Europe and the invention of the art of printing, the number of printed books has increased in such a rapid proportion, as to baffle the efforts of the most assiduous collectors and bibliographers, who have attempted, either to accumulate general libraries, or to compile what may be termed an history of universal literature. It is a well known fact among the lovers of bibliographical knowledge, that many an eminent litterator, after having spent his life in the tedious occupation of collecting the titles of books, has left his successors in that branch of science to lament the unfinished state of his labours. And, when it is considered, that the annual harvest of new publications in Germany alone, upon an average amounts to near three thousand works, we shall not surely overrate the litterary produce of all Europe, by fixing it at ten thousand volumes in the course of every year. Agreeably to this computation, a single cen-

century bids fair to be productive of a million of books and *Leibnitz* seems not to have conjectured amiss, when he facetiously maintained the increase of literature to be such, that future generations would find whole cities insufficient to contain their libraries. It was undoubtedly from the same comprehensive view of this great object, that one of the first philosophick characters in England (the present illustrious President of the Royal Society) has been heard to urge the necessity of rejecting hence forward the idea of *general* collections of book in the capital and recommending in its place, as the proper object of *private collectors*, to confine their libraries to one *individual branch* of human knowledge, by which means a great number of particular collections, each compleat in its kind, would quickly be brought forward and the purposes of instruction be more easily attained, than whilst the rage of indiscriminate collection subsisted and the number of competitors for the same book precluded the possibility of completion.

The same difficulty, which attends the methodical arrangement and compleat enumeration of all the books now extant in print, will likewise apply to that part of literature, by which we are taught to consider the authors themselves exerting their talents, under various points of view, either, as they happened to be contemporaries, or according to the different ages and countries in which they flourished, or with a view to the distinct branches of knowledge, which they cultivated and the proportion, in which they contributed to the common stock of improvement. To the works, which have appeared upon this subject, inconsiderable as their number and defective as their contents may have been, we are indebted for some general ideas concerning the comparative quantity of literary exertion, which different nations have shewn within certain periods of time, the sciences which they have cultivated in preference to others and the differences and singularities of national taste.

Ger-

Germany has hitherto been most successful in the laborious endeavours to illustrate the history of its own litterati. The indefatigable application of *Hamberger* and of his successor *Meusel* has furnished a catalogue of the authors now living in that country, in which their names and works are collected with surprizing accuracy. Their example has encouraged a number of assiduous bibliographers to illustrate the literary history of their several provinces. In other countries this useful and necessary branch of compilation has been too much neglected. *La France litteraire*, that meagre and defective performance, has not been continued since the Year 1784. The list of Spanish authors during the reign of Carlos III., by *Juan Sempere y Guarinos*, only extends to writers of some eminence, whilst Italy and all the Northern countries have not so much as attempted any thing of the kind.

*Ayscough's* index to the seventy volumes of the Monthly Review, though a work of great merit, was not however calculated to supply this

deficiency with regard to English literature, as its plan excluded all the books which had not been reviewed in those volumes. As to the catalogue of five hundred celebrated authors of Great-Britain now living, (London 1788. 8<sup>vo</sup>) it does not require great penetration to observe that those names only have been selected from the bulk of English writers, on whom the anonymous critick has thought proper to pass either censure or commendation. When these circumstances are impartially weighed, the propriety of the present publication may perhaps be the more easily admitted. Indeed the prevailing taste for English books in Germany seemed more particularly to demand an enumeration, which has not hitherto been attempted in England.

The author has confined himself intirely to the most recent literary productions of Great-Britain, Ireland and the United states of America. A period of twenty years, from 1770 to 1790 seemed to him to be most adequate to the term of modern literature. He has subjoined to the

the names of the living authors the titles of their works together with their prices, always taking care to notice the german translation, where it was known, to exist. Translations into other languages as well as biographical notes concerning the authors themselves, would have swelled, what was intended for a compendious essay, to the extent of several volumes. For the same reason, though the names of authors deceased within these last twenty years have been inserted, yet it has not been thought proper to recount their publications. In this part of his performance however, the author has met with the greatest difficulty and thinks it very probable, from the imperfection of the intelligence which he has been able to procure, that he may have placed several persons among the living, who have already paid the debt of nature. English books, written by foreigners, will naturally find a place in the literary catalogues of these nations, to whom they respectively belong, and are of course omitted here; but anonymous works have generally been referred to their proper

per authors and inserted in the present collection with an asterisk (\*) prefixed to them.

In an undertaking of this arduous nature, it is next to impossible, to avoid mistakes and omissions. These can only be corrected or supplied by the candid communications of the reader and will be received with grateful acknowledgment by the author, who takes this opportunity of returning his sincere thanks to several friends, from whom he has experienced the most valuable assistance. The author's situation having furnished him with all the printed subsidies relative to his undertaking, it will perhaps apologize for the seeming presumption of a foreigner in venturing to furnish his own countrymen with a list of British authors.

But the writer of this preface fears to have trespassed upon the indulgence of his readers, having lost the habit of writing in a language which was once familiar to him, he is aware that the eagerness to obey the summons of a friend, may prove a very unsatisfis-

tisfactory excuse for thus attempting to give the publick some account of the motives and the plan of the present publication.

Mayence. Sept. 15th  
1791.

*George Forster.*

dy in Embryo. 1772. 8. (2 sh. 6 d.) \*A series of letters. Vol. I. 2. 1788. 8. (6 sh.)

MARSHALL, [Joseph] born: .... died 17..

— [William] *Esq.* Account of the black *Canker Caterpillar* which destroys the turnips in Norfolk. (Phil. Transact. 1783. p. 217.)

MARSHAM, [Robert] of *Sutton* in Norfolk. *F. R. S.* On the growth of trees. (Phil. Transact. 1761. p. 7.) On the usefulness of washing and rubbing the stems of trees, to promote their annual increase. (Ibid. 1777. p. 12. 1781. p. 449.) Indications of spring. (Ibid. 1789. p. 154.)

MARTEN, [Thomas] *A. M.* *Marth. Prioris Almae* Lib. III. latino versu donati. 1763. 8. (1 sh.) The marriage or history of four well known characters, translated from the french novel. Vol. I. 2. 1771. 8. (5 sh.)

M'ARTHUR, [J. ....] of the Royal Navy. The army and navy gentleman's companion, or, a new treatise on the theory and practice of fencing —. 1781. 4. (10 sh. 6 d.)

MARTIN, [Benjamin] *Optician.* born 1704. died d. 9 Febr. 1782.

— [John] Familiar dialogues between Americus and Britannicus in which the right of private judgment — are considered. 1776. 8. (1 sh.) The conquest of Canaan —. 1777. 8. (3 sh.) Thoughts on the duty of man, relative to faith in Jesus Christ —. P. I. 2. 1789. 8. (3 sh.)

— [John] *Lincoln's - Inn, London, one of the Solicitor's of the Court of Session — in Scotland.* The marriage law of Scotland stated —. 1787. 8. (1 sh.) Speech on the repeal of such parts of the test and corporation acts as affect conscientious dissenters —. 1790. 8. (6 d.)

— [Matthew] *Member of the Bath Philosophical Society.* Observations of marine verms, insects —. Fasc. I. 1786. 4. (1 Sh. 6 d.) \*The Aurelian's vade mecum, containing an english alphabetical and *Linnaean* systematical catalogue of plants affording nourishment to butterflies, hawk-moths and moths in the state of Caterpillar. 1784. 12. (1 sh.)

MARTINEAU, [Philipp Meadows] *Surgeon to the Norwich and Norfolk Hospital.* History of an un-  
com-

common enlargement of the abdomen; from an affection of the kidney. (*Duncan's M. C.* Vol. 9. p. 282.) An extraordinary case of a dropsy of the ovarium with some remarks. (*Phil. Transact.* 1884. p. 471. überf. Samml. f. A. Th. XI. S. 659.)

MARTYN, [Charles] of Lambeth Terrace, *Attorney and Solicitor*. Considerations on the qualifications, clerk ships, admissions, and practice of attorneys —. 1790. 8. (1 sh. 6 d.)

MARTYN, [Thomas] *B. D. F. R. S. Professor of Botany in the University of Cambridge*. Sermon for Addenbrook's hospital. 1768. *Catalogus horti botanici Cantabrigiensis*. 1771. 8. (5 sh. 6 d.) The antiquities of Herculaneum translated from the Italian. Vol. 1. 1773. 4. (3 L. 3 sh.) Elements of natural history. 1775. 8. (1 sh. 6 d.) Address to the inhabitants of the parish of St. Anne, Westminster; with supplement: 1777. 8. (1 sh. 6 d.) \*Ecclesiastical gallantry; or, the mystery unravelled, a tale. 1778. 4. (2 sh. 6 d.) Letter to — *Will. Wynne LL.* Chancellor of the Diocese of London —. 1780. 8. (1 sh.) *J. J. Roussseau's* letters on the elements of botany — translated: 1785. 8. (7 sh.) XXXVIII. plates drawn and engraved by *F. Nodder* botanical printer to her Majesty with explanations to illustrate *Linnaeus* system of vegetables and particularly adapted to the letters on the elements of botany. 1788. 8. (18 sh.)

[Thomas] at London. The universal conchologist exhibiting the figure of every known shell accurately drawn and painted after nature with a new systematic arrangement. London 1784. fol. (7 L. 17 sh. 6 d.)

[Thomas] of *Palgrave, Suffolk, F. A. S.* died 17..

[Thomas] Hints of important uses to be derived from aerostatic globes —. fol. 1784. (2 sh.)

[Thomas] The soldiers and sailors friend; an appeal to the people of Great-Britain. 1786. 8. (1 sh.)

MARVELL, [Andrew] horn; .... died 17..

MARYATT, [Thomas] *M. D. Physician at Bristol, Somersetshire*. Therapeutics, or a new system of physic. 1775. 4. (1 L. 1 sh.)

MASERES, [Frances] *F. R. S. Curfitor Baron of the Court of Exchequer*. Dissertation on the use of the nega-

negative sign in Algebra —. 1759. 4. (14 sh.)  
 Elements of plane trigonometry with a dissertation on the nature and use of logarithms. 1760. 8. (7 sh.)  
 View of the ancient constitution of the english parliament. (Arch. Vol. 2. p. 301.) Account of the proceedings of the british and other protestant inhabitants of the province of Quebec in North-America —. 1775. 8. (3 sh.) A Method of finding the value of an infinite series of decreasing quantities of a certain form, when it converges too slowly to be summed in the common way by the mere computation and addition or subtraction of some of its initial terms. (Phil. Transact. 1777. p. 187.) A method of finding, by the help of *Is. Newton's* binomial theorem a near value of the very slowly — converging infinite series —. Ibid. 1778. p. 895.) A method of extending *Cardan's* rule for resolving one case of a cubik equation — to the other case of the same equation, which it is not naturally fitted to solve, and which is therefore called the irreducible case. (Ibid. 1778. p. 902.) Appendix; (Ibid. 1780. p. 85.) \*The Canadian freeholder. Vol. 1-3. 1779. 8. (15 sh.) Conjecture concerning the method by which *Cardan's* rules for resolving the cubic equation — were probably discovered by *Scipio Ferreus* of Bononia or whoever else was the first inventor of them. (Phil. Transact. 1780. p. 221.) Principles of the doctrine of life annuities. Vol. 1. 2. 1783. 4. (1 L. 11 sh. 6 d.)

**MASKELYNE**, [Nevil] D. D. F. R. S. at London and Göttingen: Astronomer Royal. A proposal for discovering the annual parallax of Sirius. (Phil. Transact. 1761. p. 889.) Theorem of the aberration of the rays of light refracted through a lens, on account of the imperfection of the spherical figure. (Ibid. 1762. p. 17.) Observations to be made on the parallax of the moon at St. Helena, and recommending the same to be made at Paris and Greenwich to settle the difference of longitude between Paris and St. Helena. (Ibid. p. 21. p. 26.) Observations on the transit of Venus, June 6. 1761. at the island of St. Helena. (Ibid. p. 196.) Observations on Mr. *John Shelton's* clock, made at St.

St. Helena. (Ibid. p. 434.) The results of observations of the distance of the moon from the sun and fixed stars, made in a voyage from England to the island of St. Helena, in order to determine the longitude of the Ship from time to time; together with the whole process of computation, used on this occasion. (Ibid. p. 558.) Observations on the tides at St. Helena. (Ibid. p. 586.) Proposals for determining the difference of longitude between London Paris and Greenwich, by occultations of fixed Stars by the moon. (Ibid. 1762. p. 607.) The british mariner's guide, containing compleat and easy instructions for the discovery of the longitude at sea and land — 1763. 4. (5th) Concise rules for computing the effects of refraction and parallax in varying the apparent distance of the moon from the sun or a star; also an easy rule of approximation for computing the distance of the moon from a star, the longitude and latitude of both being given, with demonstrations of the same. (Phil. Transact. 1764. p. 263.) Remarks upon the equation of time and the true manner of computing it. (Ibid. 1764. p. 336.) Astronomical observations at St. Helena. (Ibid. 1764. p. 348.) Observations on Mr. *Mason's* account of the going of Mr. *Ellicott's* clock at St. Helena. (Ibid. 1764. p. 380.) Astronomical observations at Barbadoes. (Ibid. 1764. p. 389.) Account of the going of *Harri-son's* watch at the royal observatory — 1767. (2th. 6. d.) Introduction to Mr. *Smeaton's* papers, on the menstrual parallax, arising from the mutual gravitation of the earth and moon, and its influence on the observations of the sun and planets; and on a new method of observing the heavenly bodies out of the meridian. (Phil. Transact. 1768. p. 154.) Introduction to the observations made by *Ch. Mason* and *Fer. Dixon* for determining the length of a degree of latitude, in the provinces of Maryland and Pennsylvania in North-America. (Ibid. 1768. p. 270.) Length of a degree of latitude in the provinces of Maryland and Pennsylvania; deduced from the observations of *Mason* and *Dixon*. (Ibid. 1768. p. 323.) On the proportion of english and french measures. (Ibid. 1768.

1768. p. 326.) Observations on the transit of Venus over the sun and on the eclipse of the sun, June 3. 1769. (Ibid. p. 355.) Observations on the eclipses of Jupiter's first satellite in 1769. (Ibid. 1769. p. 399.) Observations on the occultations of fixed stars in 1769. at Greenwich. (Ibid. 1769. p. 399.) Observations on the eclipse of the moon Dec. 12. 1769. at Greenwich. (Ibid. 1769. p. 399.) Observations of the transit of Venus over the sun, on June 3. 1769. made at the royal observatory Greenwich. (Tr. of A. S. Vol. 1. p. 105.) Letter — giving some account of the Hudson's bay and other northern observations of the transit of Venus June 3. 1769. (Tr. of A. S. App. p. 1.) Description of a method of measuring differences of right ascension and declination with *Dollond's* micrometer —. (Phil. Transact. 1771. p. 536.) Remarks on the *Hadley's* Quadrant —. (Phil. Transact. 1772. p. 99. and Nautical Almanac. 1774.) Method of clearing the apparent distance of the moon from a star or the sun of the effects of refraction and parallax by the help of three tables. (Nautical Almanac. 1772.) *M. de Luc's* rule for measuring heights by the barometer, reduced to the english measure of length and adapted to *Fahrenheit's* thermometer and other scales of heat and reduced to a more convenient expression. (Phil. Transact. 1774. p. 158.) Observations of eclipses of Jupiter's first satellite made at the royal observatory at Greenwich, compared with observations of the same made by *Sam. Holland* and others of his party, in several parts of North-America and the longitudes of the places thence deduced. (Ibid. 1774. p. 184.) Immersions and emersions of Jupiter's first satellite, observed at Jupiter's inlet, on the island of Anticosti, North-America by *Thom. Wright* — and the longitude of the place deduced from comparison with observations, made at Greenwich. (Ibid. 1774. p. 190.) Tables for computing the apparent places of the fixt stars and reducing observations of the planets. 1774. fol. (15 sh) Account of observations made on the mountain Scheshallien for finding its attraction. (Phil. Transact. 1775. p. 500.) Proposal for measuring the attraction of some hill in this kingdom by

by astronomical observations. (Ibid. 1775. p. 404.) Account of a new instrument for measuring small angles called the prismatic micrometer. (Ibid. 1777. p. 799.) Longitude of Cork settled from Dr. Longfield's observations. (Ibid. 1779. p. 179.) Astronomical observations made at the royal observatory at Greenwich from the Y. 1765-1783. Vol. 1. 2. 1776. 1784. fol. (2 L. 8 fh) Part of Vol. 3. 1788. fol. Advertisement of the expected return of the comet of 1532 and 1661. in the Y. 1788. (Phil. Transact. 1786. p. 426.) The latitude and longitude of the royal observatory at Greenwich, with remarks on a memorial of the late M. Cassini de Thury. (Ibid. 1787. p. 151.) Attempt to explain a difficulty in the theory of vision, depending on the different refrangibility of light (Ibid. 1789. p. 256.) überf. Gren J. d. P. Th. 2. S. 370.

MASON, [Charles] Observations for proving the going of *Ellicott's* clock at St. Helena. (Phil. Transact. 1762. p. 534.) Observations for determining a degree of latitude in Maryland and Pennsylvania. (Ibid. 1768 p. 274.) Astronomical observations made in the forks of the river Brandivine in Pennsylvania for determining the going of a clock sent thither by the royal society, in order to find the difference of gravity between the royal observatory at Greenwich, and the place where the clock was set up in Pennsylvania. (Ibid. 1768. p. 329.) Observations on the transit of Venus June 3. 1769. at Cavan. (Ibid. 1770. p. 488.) Astronomical observations made at Cavan near Strabane in the county of Donegal, Ireland. (Ibid. 1770. p. 454.)

— [John] Surgeon, at Leicester. Two cases of dropsy successfully treated by moderate doses of opium. (Med. Obs. Vol. 6. p. 19.)

— [John Monck] Commissioner of Revenue for the Kingdom of Ireland, privy Counsellor and Member of Parliament. Philipp Massinger's dramatic works — with notes and his life and writings. Vol. I-4. 1779. 8. (1 L. 1 fh.) Comments on (Reed's) edition of *Shakespeare's* plays. 1785. 8. (5 fh.)

(2 sh.) *Récueil choisi de traits historiques et de contes moraux*. 1785. 12. (3 sh. 6 d.) *Petite encyclopædie des jeunes gens* —. 1788. 12. (5 sh.)

WARBOYS, [Thomas] The preceptor, a comedy. 1777. The rival lovers, a comedy. 1777.

WARBURTON, [.....] Letter to the Chancellor of the Exchequer, shewing the necessity of a clerical reform and containing a plan for remedying the grievances of the inferior clergy. 1788. 8. (1 sh. 6 d.)

— [William] *D. D. Lord Bishop of Gloucester*. born at Newark-upon-Trent d. 24. Dec. 1698. died d. 7. June. 1779.

WARD,

WARD, [Samuel] *Vicar of Cotterstock and Claphorne, Northamptonshire.* born . . . died d. 31 March. 1790.

— [W. . . .] *The gentle shepherd*, translated from *Allan Ramsay.* 1785. 8. (2 sh.)

WARE, [James] *Surgeon: Fellow of Med. Society.* On the ophthalmy, psorophthalmy and purulent eye with methods of cure —. 1780. 8 (2 Sh. 6 d.) Ed. 2. 1787. 8. (3 Sh.) überf. *Kleine medizinisch-chirurgische Abhandlung aus verschiedenen Sprachen: Th. 1. Leipzig. 1781. 8. überf. Samml. f. A. Th. 6. S. 351-445.* A case of suppression of urine, occasioned by an enlargement of the prostrate gland. (Mem. of M. S. of L. Vol. 2. p. 336.)

WARING, [Edward] *M. D. F. R. S. of London and of Göttingen, Professor of Mathematics in the University of Cambridge.* *Miscellanea analytica, de aequationibus algebraicis et curvarum proprietatibus.* 1762. 4. Mathematical problems. (Phil. Transact. 1763. p. 294.) New properties in conic sections. (Ibid. 1764. p. 193.) Two theorems in mathematics. (Ibid. 1765. p. 143.) *Meditationes algebraicae.* 1770. 4. (10 Sh. 6 d.) Ed. 2. 1782. 4. *Proprietates algebraicarum curvarum.* 1762. 4. (5 sh.) Ed. 2. 1772. 4. *Meditationes analyticae.* 1775. 4. (1 L. 1 sh.) Ed. 2. 1785. 4. Problems concerning interpolations. (Phil. Transact. 1779. p. 59.) A general resolution of algebraical equations. (Ibid. 1779. p. 86.) On the summation of series, whose general term is a determinate function of  $z$ , the distance from the first term of the series. (Ibid. 1784. p. 385.) The infinite series. (Ibid. 1786. p. 81.) On finding the values of algebraical quantities by converging serieses and demonstrating and extending propositions given by *Pappus* and others. (Ibid. 1787. p. 71.) On centripetal forces. (Ibid. 1788. p. 67.) Some properties of the sum of the divisors of numbers. (Ibid. 1788. p. 388.) On the method of correspondent values. (Ibid. 1789. p. 166.) On the resolution of attractive powers. (Ibid. 1789. p. 185.)

— [Richard Hill] *Esq. F. R. S.* On some plants found in several parts of England. (Philos. Transact. 1771. p. 359.)

WARING,

WARING, [William] *J. J. Rousseau's dictionary of music* — translated. 1779. Ed. 2. 17. . 8. (3 Sh.)

WARTLIRE, [John] *Lecturer in Natural Philosophy.* On the refractive power of inflammable air and the decomposition of it by burning. (*Priestley's Experiments* — on air. Vol. 3. p. 365.)

WARNER, [Joseph] F. R. S: *Surgeon to Guy's Hospital in the Borough of Southwark.* Cases in surgery, with remarks. 1754. 8. (2 Sh.) Ed. 4. 1784. 8. (6 Sh.) überf. Leipzig. 1787. 8. Case of an extraordinary tumour growing on the inside of the bladder, successfully extracted. (*Phil. Transact.* 1756. p. 414.) Case of a successful operation performed on the empyema. (*Ibid.* 1757. p. 407.) Case of a piece of a bone, together with a stone in the bladder successfully extracted. (*Ibid.* 1757. p. 473.) Case of the operation for the empyema successfully performed. (*Ibid.* 1758. p. 270.) On the use of the agaric of the oak in stopping hæmorrhages. (*Ibid.* 1758. p. 588.) On the use of agaric, as a styptic. (*Ibid.* 1758. p. 813.) Two singular cases of diseased knee joints, successfully treated, the first by topical applications, the second by operation. (*Ibid.* 1759. p. 452.) Case of an aneurism on the thigh and on the uncertainty of the distinguishing symptoms. (*Ibid.* 1760. p. 363.) An instance of four rough stones that were discovered in an human urinary bladder, contrary to the received opinion, and successfully extracted by the lateral method of cutting for the stone. (*Ibid.* 1760. p. 579.) Remarkable case of an empyema: (*Ibid.* 1761. p. 194.) Account of two stones of remarkable shapes and sizes which, for the space of 6 Years, were firmly lodged in the urethra of a young man and successfully cut out from thence. (*Ibid.* 1761. p. 304.) Account of a very small foetus brought into the world at the same time with a child at its full growth. (*Ibid.* 1770. p. 451.) Description of human eye and its adjacent parts, with their principal diseases and the method proposed for relieving them. 1773. 8. (2 Sh. 6 d.) Account of the testicles, their common coverings and coats and the diseases, to which they are liable. 1774. 8. (2 Sh.) überf. (von *J. C. F. Scherf.*) Gotha 1775. 8.

WAR-

WARNER, [Richard] born.... died 1775.

— [Richard] Jun. of *Sway*, near *Lymington*. Companion in a tour round *Lymington*, comprehending an account of that place and its environs, the new forest, Isle of Wight and towns of Southampton Christchurch. 1790. 8. (4 Sh.) Hampshire: extracted from Domesday book, with a translation, view of the Anglo-Saxon history and form of governments from the reign of Alfred. 1789. 4. (1 L. 1 Sh.)
